

WHAT IS WEB DEVELOPMENT

SAAD ASLAM

Frontend developer

Web Development on three parts

1. FRONTEND

2. BACKEND

3. Full stack development

Frontend uses on two types

1.HTML

2.CSS

3.Javascript

BACK END

Backend development is that part of any software or website which is not directly visible to the users, but is completely responsible for its performance and functionality. These are the processes that manage the server, database and application logic. If we consider frontend as the shiny cover of a book, then backend is the purpose and content of that book.
